(515)918-1214 | arunkumarboda01@gmail.com | LinkedIn | GitHub

EDUCATION

University of Central Missouri

M.S., Computer Software Engineering

Missouri, MO

Jan 2025 – Present

Sri Indu College Of Engineering and Technology

B.E., Computer Science and Engineering

Telangana, India

Aug 2018 – May 2022

EXPERIENCE

Salesforce Developer

Cognizant

Sep 2022 – Dec 2024

India

- Developed and maintained **Salesforce** and **JavaScript** backend services for British Gas Ecommerce platform, improving reliability and performance by reducing load times by 40%.
- Spearheaded code reviews, applying **defensive design** techniques to ensure security and minimize errors in production.
- Utilized **SQL** to manage and retrieve data efficiently from complex database environments, enhancing data processing speed.

Software Engineer Intern

DBS Bank

Jan 2022 – Aug 2022

India

- Improved backend system performance by implementing **RESTful APIs** and containerizing services with Docker, resulting in faster load times and enhanced scalability.
- Automated several manual processes using Python scripts and Unix-based tools, contributing to operational efficiency.

PROJECTS

Food Ordering App | React, Tailwind CSS, Redux Toolkit, Node.js, API Integration, Jest

- Developed a responsive food ordering app with features like search, restaurant listings, and optimized state management, achieving 30% faster load times.
- Built from scratch using **React**, **Tailwind CSS**, and **Redux Toolkit**, with API data handling and testing via **Jest** for robust functionality.

DevTinder | Node.js, Express, MongoDB, React, JWT, Mongoose

- Developed a full-stack social platform with real-time features, secure JWT-based authentication, and dynamic feed pagination, enhancing engagement and scalability.
- Built and optimized **RESTful APIs** with error handling, middleware, and database modeling, improving performance using compound indexes and efficient queries.

CloudTunes | AWS (Lambda, S3, Glue, Athena), Spotify API

- Engineered a scalable ETL pipeline for Spotify data, enabling SQL-based real-time trend and preference analysis to enhance data-driven decision-making.

TECHNICAL SKILLS

Languages & Frameworks: C++, Java, JavaScript, SQL, TypeScript, Python, React, Node.js, Express, Django

Cloud & Databases: AWS, Azure, MySQL, PostgreSQL, MongoDB

Other Skills: Data Structures and Algorithms, RESTful API Development, Debugging, Defensive Design

Tools: Git, Docker, JIRA, Visual Studio, VS Code, Jest, Tailwind CSS, Redux Toolkit

PUBLICATIONS

- **Enhanced Physical Layer Security for RIS-aided Wireless Network** ([IEEE](#)): Developed a security framework integrating control jammers with optimized power allocation, enhancing data security in RIS-aided networks by improving resistance to interference and unauthorized access.
